

Position Title: Cyber Risk Analysis Engineer

Location: Country: United States
State: Virginia, Fort Belvoir

Description: Securicon, LLC is seeking qualified applicants to provide risk and impact analysis support for a Department of Defense client in the Fort Belvoir, VA area. The candidate will develop, implement and maintain an agency-specific risk and consequence model and methodology to conduct risk and impact analysis of agency infrastructure and components. The candidate will work closely with agency management and staff to gather information about agency IT components and then input this information into the risk and consequence model to assist agency officials in making IT decisions based on the risks presented by acting or not acting on changes to IT infrastructures given the dynamic changes to the threat and vulnerability landscapes.

This is not a typical information assurance/information security position. It requires a combination of substantial technical knowledge of cyber security, along with a "big picture" understanding of how to measure risk and remediate vulnerabilities at the enterprise and system level and the ability to develop and implement ideas into the model.

The model developed will utilize information on the current agency IT infrastructure and perform quantitative calculations to assist in making intelligent risk-based decisions.

Requirements – Must Have:

- Experience level 5-15 years
- Experience with cyber risk analysis and management
- Self-starter with the ability to work independently, and to work well cooperatively in a group
- Strong writing and presentation skills and the poise to counsel senior management on cyber security issues
- TS Clearance, SSBI Investigation

Requirements – Preferred:

- Cyber Risk Analysis and Management experience within DOD
- Experience with federal cyber risk management and NIST security standards and guidelines
- BS Degree in IT or Security field preferred (may be substituted for years of experience)
- SCI preferred

- 8570 IA Security and computing environment certifications preferred, but must attain in 6 months
