

**Position Title:** Network Operations Security Analyst

**Location:** Country: United States  
State: Virginia

**Description:** Securicon, LLC is seeking qualified applicants for a network operations security analyst in support of a Department of Defense client who will be responsible for maintaining the integrity and security of enterprise-wide systems and networks. The candidate will support security initiatives through both predictive and reactive analysis, articulating emerging trends to leadership and staff.

The candidate will coordinate resources during enterprise incident response efforts, driving incidents to timely and complete resolution. The candidate will employ advanced forensic tools and techniques for attack reconstruction, including dead system analysis and volatile data collection and analysis. The candidate will support internal HR/Legal/Ethics investigations as forensic subject matter expert. The candidate will perform network traffic analysis utilizing raw packet data, net flow, IDS, and custom sensor output as it pertains to the cyber security of communications networks. Reviews threat data from various sources and develops custom signatures for Open Source IDS or other custom detection capabilities. Correlates actionable security events from various sources including Security Information Management System (SIMS) data and develops unique correlation techniques.

The candidate will utilize understanding of attack signatures, tactics, techniques and procedures associated with advanced threats. The candidate will must be able to demonstrate hands-on experience and ability to train others in ArcSight. The candidate will develop analytical products fusing enterprise and all-source intelligence. May conduct malware analysis of attacker tools providing indicators for enterprise defensive measures, and reverse engineer attacker encoding protocols. The candidate will interface with external entities including law enforcement organizations, intelligence community organizations and other government agencies such as the Department of Defense.

**Requirements – Must Have:**

- Experience level 5-15 years
- TS Clearance, SSBI Investigation

**Requirements – Preferred:**

- BS Degree in IT or Security field preferred (may be substituted for years of experience)

- SCI preferred
- 8570 IA Security and computing environment certifications preferred, but must attain in 6 months
- Self-starter with the ability to work independently
- Strong Writing and Presentation Skills
- Ability to work well in a team setting.
